

About Neurosphere

We are a Berlin-based Neurotech company and a conscious business with one mission: To help unlock the full cognitive potential of the human brain. We want to make the advances of Neurotech simple to use, understandable and more accessible for everyone.

Now we are looking for a talented frontend development work student to join our team in Berlin.

Your challenges:

- co-development of customer interfaces as well as internal interfaces
- support for further IT-related development
- Assist QA team with new product releases and bug fixes

Skills / Requirements:

- you're a student of computer sciences or similar
- knowledge of JavaScript
- expertise in CSS3 and HTML5

Nice to have

- experience in Android development (Cordova development)
- experience in programming close to hardware
- experience with Arduino, Raspberry Pi, Teensy
- interested in recent findings in the cognitive sciences
- EEG data analysis experience with Python, Matlab
- startup experience

What we offer

Working at Neurosphere means that all your contributions will have a direct impact on the product and by extension, your work will directly help to increase the emotional and mental well-being of many people.

In addition to that, you can expect

- a dedicated, friendly and open-minded team with a passion for new technologies and neuroscience
- fast decision-making and an open startup culture
- a great office in the heart of Berlin-Mitte with lots of space for creative work
- access to table tennis, kicker table and our neurofeedback based mindfulness training

How to apply

Send your application to recruiting@neurosphere.io, marked with: "Job application: EA", including: A compact CV, A short cover letter, Link to a work profile (LinkedIn, Xing, etc.), preferred starting date.
